The university also focuses on interpersonal and extracurricular skills through uniquely featured '**Passion Program (PROPs)**'

5. Salient Features

5.1 Interdisciplinary Pedagogy

Today's needs are inherently interdisciplinary and require intense multitasking as the graduates will not be entering a career that lasts a lifetime but a lifetime of multiple careers. Quantum understands that life demands different skills for different roles. Quantum is a University that understands your needs, promotes inter-disciplinary study and prepares you for life.

We are at the threshold of the IVth Industrial Revolution (4IR) which is characterized by emerging technological breakthroughs in fields such as Artificial Intelligence, Internet of Things, Business Intelligence and Automation amongst others. This would require intense multitasking in the emerging technology driven information society. Quantum University realized these trends early. As a responsible knowledge partner, it promotes inter-disciplinary education and prepares the students for the change. Besides major professional streams of education under various faculties, the university also offers other technologies and skills, which help a student to develop unique abilities to handle new job challenges.

The university addresses many questions, which are now asked by young aspirants, such as **"Can I study Technology with Music, Agriculture with Cyber Security or Computer Science with Economics?"** **"Will my university allow me such inter-disciplinary immersion that will equip me**

to handle a range of skills and roles in my professional and personal life?”. Quantum University says why not. The university answers and hosts these valuable questions to its students.

5.2 New Age Curricula

The new age curriculum at Quantum University allows students to earn a Major degree in their chosen subject of professional interest. The Major prepares the students to step into the corporate world or to pursue post-graduate studies.

Alongside, one can earn a Certified Minor in an unrelated field by choosing a subject from open electives on attaining certain number of credits. An interesting minor makes students stand out at the time of placement.

The convergence of technologies and consequent changes in the way we work and associate has created a demand for a whole new range of skill sets. It is obligatory upon the educational sector to cater to these changes with urgency. The ‘new age curricula’ are the need of the hour. In contrast to the archaic curricula and rote learning, the new age curriculum at Quantum University aligns our education system with industry dynamics and interdisciplinary learning. Quantum University, through its contemporary curriculums, emphasizes academic, professional and personal development to navigate the upheavals of the socio-economic worlds.

A panel of very eminent experts from different domains of the academia and the industry ensure an updated, functional and outcome based curriculum at Quantum University. The two cardinal features of the Quantum curricula across the disciplines are:

5.3 Outcome Based Learning

Raising employability quotient through core competence and skill development is accorded top priority. The curriculums are constantly vetted against the industry requirements while industry collaborations are actively encouraged.

Great emphasis is also laid on domain related certificate trainings, which are of great relevance to the industry and lead to elevated placements. Alongside, training in soft skills and personality development is also an integral part of the Quantum curricula.

The second learning outcome of Quantum curriculum is laying sound foundation for higher education. For example, the B.Com (HONORS) program at Quantum, while imparting domain knowledge for ready employment, also enhances students’ preparedness to pursue higher studies for Chartered Accountancy or similar professions as a career.

5.4 Passion Programs

At Quantum University, Students are encouraged to follow their career without giving up their passion. It offers unique ‘Passion Programs’ (PROPS) through a host of clubs and societies to pursue their passion in sports, theater, dance, music, photography, design, art, community service and much more. Passion is the axiom of Quantum philosophy. Students are asked to take up Passion Programs as per their choice. The students have the chance to grow under a guided and structured format and achieve excellence in the chosen passion program. At the end of the program, students would be expected to showcase their work in front of a live audience.

5.5 Emphasis on Certified Trainings

Quantum University imparts rigorous technical and soft skills trainings under an array of industrial tie-ups and MOUs. These trainings are carried out by industry experts and are duly certified. Students build strong core competence in their respective domains and are industry – ready at the time of passing out, leading to record placements year after year.

A dedicated department, called the Department of External Programs (DEEPRO), comprising of faculty and students, constantly works towards industry liaison and arranging job fests at Quantum. Quantum has tried to break new ground with a new model of learning. It is a fact that success in the modern world is dependent on skill. The skill gap can only be bridged by application of theory, hands on work and the right training. Quantum has since moved beyond the traditional theory based learning modes. The vital importance of skill development to education has inspired Quantum University to execute a multi-dimensional training program.

To this end, we have instituted Technical Certification Programs to provide robust integrated training besides regular curricula. These programs reflect the most valued skills in the corporate technical establishment. A dedicated team of experts is in place to constantly review and update the content and style of the programs so that they match the pace of technological change. Such certification programs are available across disciplines inbuilt in the regular curricula. Quantum makes sure that when the student passes out from Quantum, not only does he have a degree but a range of industry recognized Certificates on skills that are required by the industry which makes the student industry ready and employable.

5.6 Value Added Programs (VAP)& Value Added Courses

Another facet of our skill development drive is the focus on enhancing Soft Skills with an emphasis on communication skills. These are integral for preparing students to face an interview board. Regular mock tests are organized to polish student skills in Aptitude and Logical Reasoning. Quantum has made its prime focus to sculpt industry ready workforce. We have created a new blueprint for skill development, which goes beyond the traditional summer training, internship or project work. Students, in all programs, are required to take up certain minimum credits of VALUE ADDED PROGRAMS during the entire duration of the program. These courses will be Credit Courses, but no passing grade is required in these courses. The grades earned will be included in the calculation of CGPA.

Value Added Courses (VAC) are the additional trainings (Beyond the Syllabus) imparting by faculty members and external collaborated sources. They are optional in nature. On the successful completion of the courses, students are awarded certifications from the department and collaborated industry or institutions

5.7 Certification as Minors

Quantum University focuses on inter- disciplinary approach in program selection. Quantum University offers the minor program for under graduate level. A graduate level student may obtain a certification as minor in the field of study other than his major program, for an example, a computer science student can opt for minor in economics or entrepreneurship.

5.8 Honors Programs

The University offers Honors specializations in selected areas, which will be partly delivered by the Industry. These programs shall be in collaboration with the Industry, and shall carry some extra credits as per the requirement of the specific Industry.
