| | Evaluation | Evaluation | (%) | | | | |
| | (%) | (%) | | | | | |
| Theory | 40 | 60 | 100 | | | | |
| Practical/ Dissertations/Project Report/ | 40 | 60 | 100 | | | | |
| Viva-Voce | | | | | | | |
| Internal Evalua | ation Components (| Theory Papers) | | | | | |
| Mid Term Exam | 60 Marks | | | | | | |
| Assignment –I | 30 Marks | | | | | | |
| Assignment-II | 30 Marks | | | | | | |
| Attendance | 30 Marks | | | | | | |
| Internal Evalua | tion Components (I | Practical Papers) | | | | | |
| Quiz One | 30 Marks | | | | | | |
| Quiz Two | 30 Marks | | | | | | |
| Quiz Three | 30 Marks | | | | | | |
| Lab Records/ Mini Project | 30 Marks | | | | | | |
| Attendance | 30 Marks | | | | | | |
| End Semest | er Evaluation (Prac | etical Papers) | | | | | |
| ESE Quiz | 40 Marks | | | | | | |
| ESE Practical Examination | 20 Marks | | | | | | |
| Lab Records/ Mini Project 20 Marks | | | | | | | |
| Viva- Voce | 20 Marks | | | | | | |

Structure of Question Paper (ESE Theory Paper)

The question paper will consist of 5 questions, one from each unit. Student has to Attempt all questions. All questions carry 20 marks each. Parts a) and b) of question Q1 to Q5 will be compulsory and each part carries 2 marks. Parts c), d) and e) of Q1 to Q5 Carry 8 marks each and the student may attempt any 2 parts.

Important Note:

- 1. The purpose of examination should be to assess the Course Outcomes (CO) that will ultimately lead to attainment of Programme Outcomes (PO). A question paper must assess the following aspects of learning planned for specific course i.e. Remember, Understand, Apply, Analyze, Evaluate & Create (reference to Bloom's Taxonomy). The standard of question paper will be based on mapped BL level complexity of the unit of the syllabus, which is the basis of CO attainment model adopted in the university.
- 2. Case Study is essential in every question paper (wherever it is being taught as a part of pedagogy) for evaluating higher-order learning. Not all the courses might have case teaching method used as pedagogy.
- 3. There shall be continuous evaluation of the student and there will be a provision of real time reporting on QUMS. All the assignments will evaluated through module available on ERP for time and access management of the class.

Program Structure - Bachelor of Science (Hons) in Agriculture

Introduction

Bachelor of Science (Hons) in Agriculture syllabus is broad and multidisciplinary consists of various courses in Agronomy, Horticulture, Plant Pathology, Entomology, Agricultural Economics, Extension Education, Genetics and Plant Breeding, Soil Science, Animal Husbandry apart from supporting courses in Basic Sciences, Humanities, and Agricultural Engineering.

The Bachelor of Science (Hons) in Agriculture subjects are designed in such a way that students grasp all the knowledge related to agriculture and environmental science. Towards enhancing employability and entrepreneurial ability of the graduates the Quantum University increase the practical content in the courses wherever necessary. The total number of credit hours in 8 semesters including Student READY programme will be more than 170 for all the programmes.

In order to harness regional specialties and to meet region-specific needs the Quantum University modify the content of syllabus as per the regional demands and needs. The Quantum university offering the specializations like majoring in Animal Science, Plant Protection, Soil Science, Genetics and Breeding or Agricultural Engineering.

Bridge Courses: In Agriculture students from both the background Medical and Non-medical are eligible to apply. Therefore we have the provision of bridge courses to fulfill the gap between Biology and Mathematics. Bridge Course helps students to make a successful transition into their new academic programs by providing them with the necessary background knowledge about the topics that will be covered in their new courses. In addition, Bridge Courses can also help students to develop the skills and abilities that they need to succeed in their new academic programs

Rural Agricultural Work Experience (RAWE) and Agro-Industrial Attachment (AIA): This program will be undertaken by the students during the seventh semester for a total duration of 20 weeks with a weightage of 0+20 credit hours in two parts, namely, RAWE and AIA. It will consist of general orientation and on-campus training by different faculties followed by village attachment/unit attachment in university/ college/ KVK or a research station. The students would be attached with the agro- industries to get an experience of the industrial environment and working. Due weightage in terms of credit hours will be given depending upon the duration of stay of students in villages/agro-industries. At the end of RAWE/AIA, the students will be given one week for project report preparation, presentation and evaluation.

The students would be required to record their observations in field and agro-industries on daily basis and will prepare their project report based on these observations.

Experiential Learning Programme (ELP)/ Hands On Training (HOT)

This program will be undertaken by the students preferably during the eighth semester for a total duration of 24 weeks with a weightage of 0+20 credit hours. The students will register for any of two modules, listed below, of 0+10 credit hours each.

- Production Technology Bio-agents and Bio-fertilizer
- Seed Production and Technology
- Mushroom Cultivation Technology
- Soil, Plant, Water and Seed Testing
- Poultry Production Technology
- Hybrid Seed Production Technologies

- Floriculture and Landscaping
- Food Processing
- Commercial Horticulture
- Agriculture Waste Management
- Organic Production Technology
- Commercial Sericulture

B. Choice Based Credit System (CBCS)

Choice Based Credit System (CBCS) is a versatile and flexible option for each student to achieve his target number of credits as specified by the UGC and adopted by our university.

The following is the course module designed for the B.Sc. (H) (Agricultural Studies) program:

Core competency: Students will acquire core competency in Agricultural Studies and in allied subject areas.

Program/Discipline Specific Elective Course (DSEC):

Skilled communicator: The course curriculum incorporates basics and advanced training in order to make a graduate student capable of expressing the subject through technical writing as well as through oral presentation.

Critical thinker and problem solver: The course curriculum also includes components that can be helpful to graduate students to develop critical thinking ability by way of solving problems/numerical using basic

& advance knowledge and concepts of Agricultural Studies.

Sense of inquiry: It is expected that the course curriculum will develop an inquisitive characteristic among the students through appropriate questions, planning and reporting experimental investigation. **Skilled project manager:** The course curriculum has been designed in such a manner as to enabling a graduate student to become a skilled project manager by acquiring knowledge about mathematical project management, writing, planning, study of ethical standards and rules and regulations pertaining to scientific project operation.

Ethical awareness/reasoning: A graduate student requires understanding and developing ethical awareness/reasoning which the course curriculums adequately provide.

Lifelong learner: The course curriculum is designed to inculcate a habit of learning continuously through use of advanced ICT technique and other available techniques/books/journals for personalacademic growth as well as for increasing employability opportunity.

Value Added Course (VAC): A value added audit course is a non-credit course which is basically meant to enhance general ability of students in areas like soft skills, quantitative aptitude and reasoning ability - required for the overall development of a student and at the same time crucial for industry/corporate demands and requirements. The student possessing these skills will definitely develop acumen to perform well during the recruitment process of any premier organization and will have the desired confidence to face the interview. Moreover, these skills are also essential in day-to-day life of the corporate world. The aim is to nurture every student for making effective communication, developing aptitude and a general reasoning ability for a better performance, as desired in corporate world. There shall be four courses of Aptitude in Semester I, II, III & IV semesters and two courses of Soft Skills in III & IV Semesters and will carry no credit, however, it will be compulsory for every student to pass these courses with minimum

45% marks to be eligible for the certificate. These marks will not be included in the calculation of CGPI. Students have to specifically be registered in the specific course of the respective semesters.

Skill Enhancement Course: This course may be chosen from a pool of courses designed to provide value-based and/or skill-based knowledge.

Generic/Open Elective Course (OEC): Open Elective is an interdisciplinary additional subject that is compulsory in a program. The score of Open Elective is counted in the overall aggregate marks under Choice Based Credit System (CBCS). Each Open Elective paper will be of 3 Credits in III, IV and VI semesters. Each student has to take Open/Generic Electives from department other than the parent department. Core / Discipline Specific Electives will not be offered as Open Electives.

Non CGPA Audit Course (NCAC): This is a compulsory course but audit that does not have any choice and will be of 3 credits. Each student of B.Sc. (H). Program has to compulsorily pass the Environmental Studies and Human values & professional Ethics and NSS.

C. Program Outcomes of B.Sc. (Hons.) Agriculture

| PO-01 | Agricultural knowledge | Imparting the knowledge of agriculture and allied sciences related |
|-------|------------------------|---|
| | | subjects in the current scenario of Agriculture. |
| PO-02 | Problem analysis | Develop the skills to manage agricultural farms, improve quality of |
| | | farm produces and their commercial utilization. |
| PO-03 | Development of | Design solutions for complex problems of the farming system with |
| | Solutions | due consideration of public health and environmental safety. |
| PO-04 | Conduct surveys and | Explore knowledge and methods to synthesize and interpret available |
| | investigations | information to make viable conclusions. |
| PO-05 | Modern tool usage | Select, and apply appropriate techniques, resources, and modern |
| | | agriculture technologies and tools for agricultural activities with an |
| | | understanding of the limitations. |
| PO-06 | Society Role | Apply reasoning to assess societal, health, safety, legal and cultural |
| | | issues and the consequent responsibilities relevant to the professional |
| | | practices in agriculture. |
| PO-07 | Environment and | Understand the impact of the professional scientific solutions on |
| | sustainability | societal and environmental issues, and impart knowledge and need for |
| | | sustainable development. |
| PO-08 | Ethics | Apply ethical principles and commit to professional ethics and |
| | | responsibilities and norms of the agricultural practices. |
| PO-09 | Individual and Team | Function effectively as an individual, and as a member or leader in |
| DO 10 | work | diverse teams, and in multidisciplinary settings. |
| PO-10 | Communication | Communicate effectively through concise documents on complex |
| 70.11 | D : | agricultural problems and challenges in Agriculture. |
| PO-11 | Project Management and | Impart knowledge and understand all related methods in agriculture to |
| | Finance | apply it in one's work individually or in a team to manage projects |
| DO 12 | 7:01 | and increase the profit from crop fields and livestock. |
| PO-12 | Life-long learning | Recognize the need for, and have the preparation and ability to engage |
| | | independently in life-long learning in the broadest context of |
| | | agricultural and technological changes. |

D. Program Specific Outcomes:

PSO1: Ability to analyze and apply agricultural knowledge for proposing solutions to real world problems through incubation of innovative ideas in the agricultural field.

PSO2: To understand modern management and production techniques to resolve the agricultural issues based on societal and environmental perspective

E. Program Educational Objectives (PEO's)

PEO1. To understand and be acquainted with several aspects in the field of agriculture to lead a successful career in industry or as an entrepreneur or to pursue higher education.

PEO2. To develop the ability to provide solutions for complex issues in agriculture using advance technologies with sustainability.

PEO3. To install lifelong learning approach constantly evolving technologies with innovative and ethical mindset.

F. Pedagogy & Unique practices adopted:

"Pedagogy is the method and practice of teaching, especially for teaching an academic subject or theoretical concept". In addition to conventional time-tested lecture method, the institute will emphasize on experiential learning:

Role Play & Simulation: Role- play and simulation are forms of experiential learning. Learners take on different roles, assuming a profile of a character or personality, and interact and participate in diverse and complex learning settings. Role-play and simulation function as learning tools for teams and groups or individuals as they "play" online or face-to-face. They alter the power ratios in teaching and learning relationships between students and educators, as students learn through their explorations and the viewpoints of the character or personality they are articulating in the environment. This student-centered space can enable learner-oriented assessment, where the design of the task is created for active student learning. Therefore, role-play& simulation exercises such as virtual share trading, marketing simulation etc. are being promoted for the practical-based experiential learning of our students.

Video Based Learning (VBL) & Learning through Movies (LTM): These days technology has taken a front seat and classrooms are well equipped with equipment and gadgets. Video-based learning has become an indispensable part of learning. Similarly, students can learn various concepts through movies. In fact, many teachers give examples from movies during their discourses. Making students learn few important theoretical concepts through VBL & LTM is a good idea and method. The learning becomes really interesting and easy as videos add life to concepts and make the learning engaging and effective. Therefore, our institute is promoting VBL & LTM, wherever possible.

Field/Live Projects: The students, who take up experiential projects in companies, where senior executives with a stake in teaching guide them, drive the learning. All students are encouraged to do some live project other their regular classes.

Industrial Visits: Industrial visit are essential to give students hand-on exposure and experience of how things and processes work in industries. Our institute organizes such visits to enhance students' exposure to practical learning and work out for a report of such a visit relating to their specific topic, course or even domain.

MOOCs: Students may earn credits by passing MOOCs as decided by the college. Graduate level programs may award Honors degree provided students earn pre-requisite credits through MOOCs. University allows students to undertake additional subjects/course(s) (In-house offered by the university through collaborative efforts or courses in the open domain by various internationally recognized universities) and to earn additional credits on successful completion of the same. Each course will be approved in advance by the University following the standard procedure of approval and will be granted credits as per the approval. Keeping this in mind, University proposed and allowed a maximum of two credits to be allocated for each MOOC courses. In the pilot phase it is proposed that a student undertaking and successfully completing a MOOC course through only NPTEL could be given 2 credits for each MOOC course.

For smooth functioning and monitoring of the scheme the following shall be the guidelines for MOOC courses, Add-on courses carried out by the College from time to time.

- a) It will necessary for every student to take at least one MOOC Course throughout the programme.
- b) There shall be a MOOC co-ordination committee in the College with a faculty at the level of Professor heading the committee and all Heads of the Department being members of the Committee.
- c) The Committee will list out courses to be offered during the semester, which could be requested by the department or the students and after deliberating on all courses finalize a list of courses to be offered with 2 credits defined for each course and the mode of credit consideration of the student. The complete process shall be obtained by the College before end of June and end of December for Odd and Even semester respectively of the year in which the course is being offered. In case of MOOC course, the approval will be valid only for the semester on offer.
- d) Students will register for the course and the details of the students enrolling under the course along with the approval of the Vice Chancellor will be forwarded to the Examination department within fifteen days of start of the semester by the Coordinator MOOC through the Principal of the College.
- e) After completion of MOOC course, Student will submit the photo copy of Completion certificate of MOOC Course to the Examination cell as proof.
- f) Marks will be considered which is mentioned on Completion certificate of MOOC Course.
- g) College will consider the credits only in case a student fails to secure minimum required credits then the additional subject(s) shall be counted for calculating the minimum credits required for the award of degree.

Special Guest Lectures (SGL) & Extra Mural Lectures (EML): Some topics/concepts need extra attention and efforts as they either may be high in difficulty level or requires experts from specific industry/domain to make things/concepts clear for a better understanding from the perspective of the industry. Hence, to cater to the present needs of industry we organize such lectures, as part of lecture-series and invite prominent personalities from academia and industry from time to time to deliver their vital inputs and insights.

Student Development Programs (SDP): Harnessing and developing the right talent for the right industry an overall development of a student is required. Apart from the curriculum teaching various student development programs (training programs) relating to soft skills, interview skills, SAP, Advanced excel training etc. that may be required as per the need of the student and industry trends, are conducted across the whole program. Participation in such programs is solicited through volunteering and consensus.

Industry Focused programmes: Establishing collaborations with various industry partners to deliver the programme on sharing basis. The specific courses are to be delivered by industry experts to provide practice-based insight to the students.

Special assistance program for slow learners & fast learners: write the note how would you identify slow learners, develop the mechanism to correcting knowledge gap. Terms of advance topics what learning challenging it will be provided to the fast learners.

Induction program: Every year 3 weeks induction program is organized for 1st year students and senior students to make them familiarize with the entire academic environment of university including Curriculum, Classrooms, Labs, Faculty/ Staff members, Academic calendar and various activities.

Mentoring scheme: There is Mentor-Mentee system. One mentor lecture is provided per week in a class. Students can discuss their problems with mentor who is necessarily a teaching faculty. In this way, student's problems or issues can be identified and resolved.

Competitive exam preparation: Students are provided with one class in every week for GATE/Competitive exams preparation.

Extra-curricular Activities: organizing & participation in extracurricular activities will be mandatory to help students develop confidence & face audience boldly. It brings out their leadership qualities along with planning & organizing skills. Students undertake various cultural, sports and other competitive activities within and outside then campus. This helps them build their wholesome personality.

Career & Personal Counseling: - Identifies the problem of student as early as possible and gives time to discuss their problems individually as well as with the parents. Counseling enables the students to focus on behavior and feelings with a goal to facilitate positive change. Its major role lies in giving: Advice, Help, Support, Tips, Assistance, and Guidance.

Participation in Flip Classes, Project based Learning(A2 Assignment), Workshops, Seminars & writing & Presenting Papers: Departments plan to organize the Flip Classes, Project based Learning(A2 Assignment), workshops, Seminars & Guest lecturers time to time on their respective topics as per academic calendar. Students must have to attend these programs. This participation would be count in the marks of general Discipline & General Proficiency which is the part of course scheme as non-credit course.

Formation of Student Clubs, Membership & Organizing & Participating events: Every department has the departmental clubs with the specific club's name. The entire student's activity would be performed by the club. One faculty would be the coordinator of the student clubs & students would be the members with different responsibility.

Capability Enhancement & Development Schemes: The Institute has these schemes to enhance the capability and holistic development of the students. Following measures/ initiatives are taken up from time to time for the same: Career Counseling, Soft skill development, Remedial Coaching, Bridge Course, Language Lab, Yoga and Meditation, Personal Counseling

Library Visit & Utilization of QLRC: Students may visit the library from morning 10 AM to evening 8 PM. Library created its resources Database and provided Online Public Access Catalogue (OPAC) through which users can be accessed from any of the computer connected in the LAN can know the status of the book. Now we are in process to move from OPAC to KOHA.

Detailed Syllabus (Semester wise /course wise) SEMESTER 1 Year -1

| AG3101 | Title :Introductory Biology | L T P C 1 0 0 1 |
|---|--|---------------------------|
| Version No. | 1.0 | |
| Course Prerequisites | Nil | |
| Objectives | This course aims to learn about the basic concepts of biology and its role in agriculture | |
| Unit Nos. | Unit Title | Number of hours(per Unit) |

|----------------------|---|--------------------|
| Version No. | 1.0 | |
| Course Prerequisites | Nil | |
| Objectives | This course aims to learn the basic principles of agriculture and crop production in the field level. | |
| | List of Experiments | |

Perform any Seven)

- 1. Identification of crops, seeds, fertilizers, pesticides and tillage implements.
- 2. Study of agro climatic zones of India.
- 3. Identification of weeds in crops.
- 4. Methods of herbicide and fertilizer application.
- 5. Study of yield contributing characters and yield estimation.
- 6. Seed germination and viability test.
- 7. Numerical exercises on fertilizer requirement, plant population, herbicides and water requirement.
- 8. Use of tillage implements-reversible plough, One way plough, harrow, leveler, seed drill.
- 9. Study of soil moisture measuring devices.
- 10. Measurement of field capacity, bulk density and in filtration rate.
- 11. Measurement of irrigation water.

| Version No. | 1.0 | |
| Course Prerequisite s | Nil | |
| Objectives | The main objective is to use biotechnology in crops, with a view to understand the techniques | |
| | List of Experiments | |

(Perform any Seven Experiments)

- 1. Preparation of solution, pH & buffers.
- 2. Qualitative tests of carbohydrates and amino acids.
- 3. Quantitative estimation of glucose/proteins. Titration methods for estimation of amino acids/lipids.
- 4. Effect of pH, temperature and substrate concentration on enzyme action.
- 5. Paper chromatography/ TLC demonstration for separation of amino acids/ Monosaccharides. Sterilization techniques. Composition of various tissue culture media
- 6. Preparation of stock solutions for MS nutrient medium.
- 7. Callus induction from various explants.
- 8. Micro-propagation, hardening and acclimatization.
- 9. Demonstration on isolation of DNA.
- 10. Demonstration of gel electrophoresis techniques and DNA finger printing

| AG3203 | Title: Fundamentals of Agricultural Economics | LTPC 2002 |
| Versio nNo. | 1.0 | |
| Course Prerequisi | Nil | |
| tes Objectives | Students will gain knowledge on basic concepts and principles necessary for economic analysis in Agriculture sector | |
| Unit Nos. | Unit Title | Number ofhours (per Unit) |
| Unit 1 | Introduction | 5 |
| macro econo equilibrium, demand, utili characteristic | Meaning, scope and subject matter, definitions, activities, approaches to economic analysmics, positive and normative analysis. Nature of economic theory; rationality assumption economic laws as generalization of human behavior. Basic concepts: Goods and services, ty, cost and price, wealth, capital, income and welfare. Agricultural economics: meaning s of agriculture, importance and its role in economic development. Agricultural planning in the country | n, concept of desire, want, g, definition, |
| Unit 2 | Demand | 5 |
| diminishing r concept of co cross elastici returns: Law | caning, law of demand, demand schedule and demand curve, determinants, utility the marginal utility, equi-marginal utility principle. Consumer's equilibrium and derivation of demands surplus. Elasticity of demands concept and measurement of price elasticity, income ty. Production: process, creation of utility, factors of production, input output relations of variable proportions and law of returns to scale. | emand curve, elasticity and hip. Laws of |
| Unit 3 | Cost | 5 |
| supply curve, features of pe and long run | determinants of supply, elasticity of supply. Market structure: meaning and types of market rfectly competitive and imperfect markets. Price determination under perfect competition; slequilibrium of firm and industry, shut down and break even points. Distribution theory: mear ricing of factors of production. Concepts of rent, wage, interest and profit. | , basic nort run |
| Unit 4 | National Income | 5 |
| measurement natural and s system of ex | <i>ome:</i> Meaning and importance, circular flow, concepts of national income accounting and a difficulties in measurement. Population: Importance, Malthusian and Optimum popula ocio-economic determinants, current policies and programme on population control. More change and its problems, evolution, meaning and functions of money, classification of meal price index, inflation and deflation. | tion theories, ney: Barter |
| Unit 5 | Banking | 5 |
| Banking: Rol Agricultural public expend | e in modern economy, types of banks, functions of commercial and central bank, credit creand public finance: meaning, micro v/s macro finance, need for agricultural finance, public diture. <i>Tax:</i> meaning, direct and indirect taxes, agricultural taxation, VAT. <i>Economic system</i> and its functions, important features of capitalistic, socialistic and mixed economies, | e revenue and ms: Concepts |

BSc Agriculture V 2022 **AG3204 Title:** Fundamentals of Plant Pathology LTPC 3 0 0 3 Version No. 1.0 Nil **Course Prerequisites Objectives** To study the nature, causes and prevention/protection of *plant* To study on minimization of the *crop* losses through adaption *principles* of disease prevention. Unit No. **Unit Title** No. of hours(per Unit) Introduction Unit I Importance of plant diseases, scope and objectives of Plant Pathology. History of Plant Pathology with special reference to Indian work. Terms and concepts in Plant Pathology. Pathogenesis. Causes / factors affecting disease development: disease triangle and tetrahedron and classification of plant diseases. Introduction to Important plant pathogenic organisms of Uttarakhand and India, different groups: fungi, bacteria, fastidious vesicular bacteria, phytoplasmas, spiroplasmas, viruses, viroids, algae, protozoa, phanerogamic parasites and nematodes with examples of diseases caused by them. Diseases and symptoms due to abiotic causes. **Unit II** Study of Fungi Fungi: general characters, definition of fungus, somatic structures, types of fungal thalli, fungal tissues, modifications of thallus, reproduction (asexual and sexual). Nomenclature, Binomial system of nomenclature, rules of nomenclature, classification of fungi. Key to divisions, sub-divisions, orders and classes. **Unit III** Study of Bacteria Bacteria and mollicutes; general morphological characters. Basic methods of classification and reproduction. **Unit IV Study of Viruses** 6 Viruses: nature, structure, replication and transmission. Study of phanerogamic plant parasites. **Study of Nematode** Nematodes: General morphology and reproduction, classification, symptoms and nature of damage caused by plant nematodes (Heterodera, Meloidogyne, Anguina, Radopholus etc.) Growth and reproduction of plant pathogens. Liberation / dispersal and survival of plant pathogens. Types of parasitism and variability in plant pathogens. Pathogenesis. Role of enzymes, toxins and growth regulators in disease development. Defense mechanism in plants. Epidemiology: Factors affecting disease development. Principles and methods of plant disease management. Nature, chemical combination, classification, mode of action and formulations of fungicides and antibiotics Mehrotra, R.S. and Agrawal, A. Plant Pathology. 2013. 2nded. Tata McGraw **Text Books** HillPublishing Co. Ltd., New Delhi. Singh, R.S. Introduction to Principles of Plant Pathology. 2011. 4thed. Oxford &IBH Publishing Company. New Delhi. Agrios, G.N. 2005. BSc Agriculture V 2022 **Title:**Soil and Water Conservation Engineering AG3205 LTPC 2 0 0 2 1.0 Version No. Course **Prerequisite Objectives** To teach about fundamental aspects of soil and water conservation engineering To improve the understanding of soil and water dynamics through use of modern technology. Unit Title Unit Nos. Number of hours (per Unit) Unit 1 Soil & Water Erosion Soil erosion - Introduction, causes and types - geological and accelerated erosion, agents, factors affecting and effects of erosion. Water erosion - Mechanics and forms - splash, sheet, rill, gully, ravine and stream bank erosion. Gullies - Classification, stages of development. Unit 2 **Erosivity & Erodibilty** 6 Soil loss estimation - Universal soil loss equation (USLE) and modified USLE. Rainfall erosivity - estimation by KE>25 and EI methods. Soil erodibility - topography, crop management and conservation practice factors. Measurement of soil erosion - Runoff plots, soil samplers. Water erosion control measures - agronomical measures - contour farming, strip cropping, conservation tillage and mulching. **Engineering Measures** 5 Unit 3 Engineering measures- Bunds and terraces. Bunds - contour and graded bunds - design and surplussing arrangements. Terraces - level and graded broad base terraces, bench terraces - planning, design and layoutprocedure, contour stonewall and trenching. **Gully And Ravine** Unit 4 Reclamation Gully and ravine reclamation - principles of gully control - vegetative measures, temporary structures and diversion drains. Grassed waterways and design. Unit 5 Wind Erosion 5 Wind erosion- Factors affecting, mechanics, soil loss estimation and control measures - vegetative, mechanical measures, wind breaks and shelter belts and stabilization of sand dunes. Land capability classification. Rate of sedimentation, silt monitoring and storage loss in tanks. Text Books 1. Land and Water Management Engineering, 1982, Murthy V.V.N. | AG3209 | Title: Fundamentals of Entomology | L T P C 3 0 0 3 | | | | | | | | |
|---|--|-----------------------------------|--|--|--|--|--|--|--|--|
| Version No. | 1.0 | | | | | | | | | |
| Course Prerequisite s | Nil | | | | | | | | | |
| Objectives | To the betterment of humankind by detecting the role of insects in the spread of disease and discovering ways of protecting food and livestock from being damaged | | | | | | | | | |
| Unit Nos. | Unit Title | Number of hours(per Unit) | | | | | | | | |
| Unit I | Introduction of Entomology and External Morphology | 10 | | | | | | | | |
| and functions of it and modifications Structure of male a | daupto classes. Relationship of class Insecta with other classes of Arthropoda. Mornsect cuticle and molting. Body segmentation. Structure of Head, thorax and abd of insect antennae, mouth parts, legs, Wing venation, modifications and wing coand female genital organ. | omen. Structure oupling apparatus | | | | | | | | |
| Unit II | Anatomy of Insects | 6 | | | | | | | | |
| excretory, respirat | nd diapauses in insects. Types of larvae and pupae. Structure and functions of dig tory, nervous, secretary (Endocrine) and reproductive system, in insects. Types sory organs like simple and compound eyes, chemoreceptor. | | | | | | | | | |
| Unit III | Insect Ecology | 5 | | | | | | | | |
| | troduction, Environment and its components. Effect of abiotic factors—temperature, light, atmospheric pressure and air currents. Effect of biotic factors — food competistance | | | | | | | | | |
| Unit IV | Classification of Insect | 8 | | | | | | | | |
| hazards and limit | nsecticides, toxicity of insecticides and formulations of insecticides. Chemical coations. Recent methods of pest control, repellents, antifeedants, hormones, attraides Act 1968-Important provisions. Application techniques of spray fluids. Symptotes. | ctants, gamma | | | | | | | | |
| Unit V | Systematic | 10 | | | | | | | | |
| Sub-species, Specinsects with specia | onomy –importance, history and development and binomial nomenclature. Definition ies, Genus, Family and Order. Classification of class Insectaupto Orders, basic great emphasis to orders and families of Agricultural importance like Orthoptera, Dioptera, Thripidae, Hemiptera, Neuroptera, Lepidoptera, Coleoptera, Hymenoptera, Dioptera, Coleoptera, Col | oups of present day | | | | | | | | |

BSc Agriculture V 2022

Date of approval 20.10.2022 by the Academic Council

Course Outcome for AG3209

| Unit-wise CourseOutcome | Descriptions | BL Level | Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (<i>Use</i> , <i>for more</i> than One) |
|----------------------------|---|-------------|---|
| CO1 | Students will be able to know about the background and history of entomology in India and will also be aware about the relationship of insects with other arthropods. | 2 | Emp |
| CO2 | Students will be able to know about the external morphology, physiology and anatomy of insects | 2 | Emp |
| CO3 | Students will gain knowledge about the different methods of pest control and use of chemicals in the prevention of insects. | 3 | Emp, S, Ent |
| CO4 | Students will understand about the use of systematic in insect class and also learn some important order of insect class. | 2 | Emp |
| CO5 | Students will learn about the practical methods of preservation of insects, sampling techniques and using of appliances in prevention of pests. | 3 | Emp, S, Ent |

| AG3213 | Title: Fundamentals of Genetics | L T P C 2 0 0 2 |
|---|---|---------------------------|
| Version No. | 1.0 | |
| Course Prerequisite s | Nil | |
| Objectives | This course aims to learn the basic concepts of genetics and cytology and their applications in agriculture. | |
| Unit Nos. | Unit Title | Number of hours (perUnit) |
| Unit 1 | Mendelian Genetics | 3 |
| Pre and Post Men | delian concepts of heredity, Mendelian principles of heredity Probability and Chi-square., | |
| Unit 2 | Principles Of Cytogenetics | 5 |
| | hromosome; chromonemata, chromosome matrix, chromomeres, centromere, secondary of chromosomes. Chromosomal theory of inheritance- cell cycle and cell div | |
| Unit 3 | Gene Interaction | 6 |
| sex limited and se | ons with example. Multiple alleles, pleiotropism and pseudoalleles, Sex determination and ex influenced traits, Blood group genetics, Linkage and its estimation, crossing , chromosome mapping. Dominance relationships. | sex linkage, |
| Unit 4 | Mutation And Quantitative Genetics | 6 |
| haploids in Genet mutagenic agents | merical variations in chromosome and their implications, Use of haploids, dihaploids and continuous, classification, Methods of inducing mutations & CIB technique, and induction of mutation. Qualitative & Quantitative traits, Polygenes and continuous varypothesis, Cytoplasmic inheritance. | |
| Unit 5 | Gene And Nucleic Acid | 4 |
| mechanism of ger Trp operons. | 8. Nature, structure & replication of genetic material. Protein synthesis, Transcription and to netic material, Gene concept: Gene structure, function and regulation, Lac and | ranslational |

BSc Agriculture V 2022

| AG3241 | Title: Fundamentals of Agricultural Extension Education Lab | L T P C 0 0 2 1 |
|-----------------------------|---|--------------------|
| Version No. | 1.0 | |
| Course Prerequisites | Nil | |
| Objectives | To provide the extension education is the overall development of therural people. | |

List of Experiments

(Perform any seven experiments)

- 1. To get acquainted with university extension system. Group discussion-exercise;
- 2. Handling and use of audio visual equipments and digital camera and LCD projector; preparation and use of AV aids,
- 3. Preparation of extension literature leaflet, booklet, folder, pamphlet news stories and success stories;
- 4. Presentation skills exercise; micro teaching exercise; A visit to village to understand the problems being encountered by the villagers/ farmers;
- 5. To study organization and functioning of DRDA and other development departments at district level;
- 6. Visit to NGO and learning from their experience in rural development; understanding PRA techniques and their application in village development planning;
- 7. Exposure to mass media: visit to community radio and television studio for understanding the process of programme production
- 8. Script writing, writing for print and electronic media, developing script for radio and television.

BSc Agriculture V 2022 Title: Fundamentals of Crop Physiology Lab **AG3242** LTPC 0 0 2 1 Version No. 1.0 Nil **Course Prerequisite** Students will study the processes and functions of the crops at cellular, **Objectives** sub-cellular and whole plant levels in response to environmental variables and growth. List of **Experiments**

(Perform any Seven Experiments)

- 1. Study of plant cells.
- 2. Experiments on diffusion, osmosis and imbibitions.
- 3. Determination of transpiration rate by photometers.
- 4. Extraction of photosynthetic pigments, separation of chlorophyll "a" and "b" and carotenoides.
- 5. Experiments on factors affecting rate of photosynthesis (CO, light and temperature).
- 6. Determination of photosynthetic and respiration rates through portable CO2 gas analyzer.
- 7. Separation of photosynthetic pigments through paper chromatography.
- 8. Estimation of relative water content.

BSc Agriculture V 2022

| AG3243 | Title: Fundamentals of Entomology Lab | L T P C 0 0 2 1 | | | | | |
|----------------------|---|--------------------|--|--|--|--|--|
| Version No. | 1.0 | | | | | | |
| Course Prerequisites | Nil | | | | | | |
| Objectives | To study about the way beneficial insects contributes to the well being of humans, animals, and plants. | | | | | | |
| List of Experiments | | | | | | | |

(Perform any seven experiments)

- 1. Methods of collection and preservation of insects including immature stages.
- 2. External features of Grasshopper/Blister beetle; Types of insect antennae, mouthparts and legs.
- 3. Wing venation, types of wings and wing coupling apparatus.
- 4. Types of insect larvae and pupae; Dissection of digestive system in insects (Grasshopper).
- 5. Dissection of male and female reproductive systems in insects(Grasshopper).
- 6. Study of characters of orders Orthoptera, Dictyoptera, Odonata, Isoptera, Thysanoptera, Hemiptera, Lepidoptera, Neuroptera, Coleoptera, Hymenoptera, Diptera and their families of agricultural importance. Insecticides and their formulations.
- 7. Pesticide appliances and their maintenance.
- 8. Sampling techniques for estimation of insect population and damage.
- 9. Pesticide appliances and their maintenance.
- 10. Sampling techniques for estimation of insect population and damage.

| Mode of Evaluation | Internal and External Examinations |
|--|------------------------------------|
| Recommendation by Board of Studies on | 31.05.2022 |
| Date of approval by the Academic Council | 20.10.2022 |

Course Outcome for AG3243

| Unit-wise CourseOutcome | Descriptions | BL Level | Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (<i>Use</i> , for more than One) |
|----------------------------|--|-------------|--|
| CO1 | Students would learn about the insect collection and preservation, types of insect antennae, mouth parts and legs | 2 | Emp |
| CO2 | Students would learn about the external features and digestive system of grass hopper | 2 | Emp |
| CO3 | Students will learn about pesticide appliances and their maintenance | 3 | Emp, S, Ent |
| CO4 | Students will learn sampling techniques for estimation of insect population and damage | 2 | Emp |
| CO5 | Students will learn about characters of different orders i.e., Orthoptera, Dictyoptera, Odonata, Isoptera, Thysanoptera, Hemiptera, Lepidoptera, Neuroptera, Coleoptera, Hymenoptera, Diptera. | 3 | Emp, S |

| AG3244 | Title: Fundamentals of Plant Pathology Lab | L T P C 0 0 2 1 |
|-----------------------------|--|--------------------|
| Version No. | 1.0 | |
| Course Prerequisite s | Nil | |
| Objectives | To study the nature, causes and prevention/protection of <i>plant diseases</i> . To study on minimization of the <i>crop</i> losses through adaption <i>principles</i> of disease prevention. | |
| | List of Experiments | |

(Perform any Seven Experiments)

- 1. Acquaintance with various laboratory equipments and microscopy.
- 2. Collection and preservation of disease specimen.
- 3. Preparation of media, isolation and Koch's postulates.
- 4. General study of different structures of fungi.
- 5. Study of symptoms of various plant diseases.
- 6. Study of representative fungal genera
- 7. Staining and identification of plant pathogenic bacteria.
- 8. Study of phanerogamic plant parasites and transmission of plant viruses.
- 9. Study of morphological features and identification of plant parasitic nematodes.
- 10. Sampling and extraction of nematodes from soil and plant material, preparation of nematode mounting.
- 11. Study of fungicides and their formulations.
- 12. Methods of pesticide application and their safe use.
- 13. Calculation of fungicide sprays concentrations.

| | 1.0 | | 1 |
| Version No. | 1.0 | | |
| Course Prerequisites | Nil | | |
| Objectives | This co | ourse aims to learn the basic concepts of genetics and cytology. | |
| Course Outcome | | | |
| | CO 1 | Students will be able to handle microscope and understand concept about monhybrid, dihybrid, test cross & back cross. | |
| | CO 2 | Students will learn about cell structure, cell division & numerical problems of probability and Chi-square test. | |
| | CO 3 | Students will be able to identfy DNA & RNA structures and understand the estimation of linkage. | |
| | CO 4 | Students will get knowledge about different gene interactions | |
| | CO 5 | Students will get knowledge about Sex Chromosome and sex determination | |
| | 1 | List of | |
| | | Experiments | |

(Perform any seven experiments)

- 1. Study of microscope.
- 2. Study of cell structure.
- 3. Mitosis and Meiosis cell division.
- 4. Experiments on monohybrid, dihybrid, trihybrid, test cross and backcross.
- 5. Experiments on epistatic interactions including test cross and backcross.
- 6. Practice on mitotic and meiotic cell division.
- 7. Experiments on probability and Chi-square test.
- 8. Determination of linkage and cross-over analysis (through two point test cross and three point test
- 9. Study on sex linked inheritance in Drosophila.
- 10. Study of models on DNA and RNAstructures.

SEMESTER 3rd Year -2

| CY3305 | Title: Environmental Studies and Disaster Management | L T P C |
|-----------------------------|---|------------------------------|
| | | 3 0 0 3 |
| Version No. | 1.0 | |
| Course Prerequisites | Nil | |
| Objectives | Creating awareness among agriculture students about the importance of environment, the effect of technology on the environment and ecological balance is the prime aim of the course. | |
| Unit No. | Unit Title | No. of hours(per Unit) |
| Unit I | Introduction to Environmental studies and Ecosystems | 6 |

Environmental scenario of Uttarakhand region, Multidisciplinary nature of environmental studies, Scope and importance, Need for public awareness.

Concept of an ecosystem-Structure and function of an ecosystem, Energy flow in an ecosystem: food chains, food webs and ecological pyramids, Ecological succession, Case studies of the following ecosystems:

- a) Forest ecosystem
- b) Grassland ecosystem
 - c) Desert ecosystem
- d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

| Unit II | Natural Resources: Renewable and Non-renewable resources | 6 |
|---------|--|---|
| | | İ |

Land resources and land use change: Land as a resource, land degradation, landslides (natural & man-induced), soil erosion and desertification. Forests & forest resources: Use and over-exploitation, deforestation, case studies. Impacts of deforestation, mining, dam building on environment, forests, biodiversity and tribal populations. Resettlement and rehabilitation of project affected persons; problems and concerns, case studies. Water resources: Use and over-exploitation of surface and ground water, floods, drought, conflicts over water (international & inter- state). Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture,

Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies. Energy resources: Renewable and non renewable energy sources, use of alternate energy sources, growing energy needs, case studies.

| Unit III | Biodiversity and Conservation | 6 | | | | | |
|---|---|------------------|--|--|--|--|--|
| | | | | | | | |
| Levels of biological diversity: genetic, species and ecosystem diversity. Biogeographic zones of India. Ecosystem and | | | | | | | |
| biodiversity services: I | Ecological, economic, social, ethical, aesthetic and Informational values. Biodi- | versity patterns | | | | | |

biodiversity services: Ecological, economic, social, ethical, aesthetic and Informational values. Biodiversity pattern and global biodiversity hot spots. India as a mega-biodiversity nation; Endangered and endemic species of India. Threats to biodiversity: Habitat loss, poaching of wildlife, man-wildlife conflicts, biological invasions. Conservation ofbiodiversity: In-situ and Ex-situ conservation of biodiversity.

| Unit IV | Environmental Pollution & Environmental Policies and Practices | 10 |
|---------|--|----|
| | | |

BSc Agriculture V 2022

Environmental pollution and its types. Causes, effects and control measures of : a) Air pollution, b) Water pollution – freshwater and marine, c) Soil pollution, d) Noise pollution, e) Thermal pollution. Nuclear hazards and human health risks. Solid waste management: Control measures of urban and industrial waste. Role of an individual in prevention of pollution. Pollution case studies.

Environmental ethics; issues and possible solutions. Climate change, global warning: causes, effects and mitigation (national and international efforts). Ozone layer depletion: causes, effects and mitigation (national and international).

Sustainable Development: Definition, concepts and currencies. Sustainable development of agro-ecosystem (organic farming), Sericulture, floriculture, bee keeping, Sustainable development of hydroenergy in Uttaranchal, Traditional Ecological knowledge (TEK).

Anthropogenic and natural environmental problems. Environmental Protection Act 1986, Air (Prevention and Control of pollution) Act, Water (Prevention and control of Pollution) Act, Wildlife Protection Act 1972, Forest Conservation

Act 1980, The Biological Diversity Act 2002, Issues involved in enforcement of environmental legislation, public awareness, Article 48A and 51A, Automobile Emission standards (Eco/Bharat), Ecomark.

| , | // | |
|--------|---------------------|----|
| Unit V | Disaster Management | 10 |

Natural Disasters- Meaning and nature of natural disasters, their types and effects. Floods, drought, cyclone, earthquakes, landslides, avalanches, volcanic eruptions, Heat and cold waves, Climatic change: global warming, Sea level rise, ozone depletion.

Man Made Disasters- Nuclear disasters, chemical disasters, biological disasters, building fire, coal fire, forest fire, oil fire, air pollution, water pollution, deforestation, industrial waste water pollution, road accidents, rail accidents, air accidents, sea accidents.

Disaster Management- Effect to migrate natural disaster at national and global levels. International strategy for disaster reduction. Concept of disaster management, national disaster management framework; financial arrangements; role of NGOs, community –based organizations and media. Central, state, district and local administration; Armed forces in disaster response; Disaster response; Police and other organizations.

BSc Agriculture V 2022 **AG3301 Title:** Crop Production Technology - I(*Kharif* crops) LTPC 2002 Version No. 1.0 **Course Prerequisites** Nil **Objectives** To study about latest biotechnology options for crop improvement and production, develop knowledge of integrated crop management systems and to study about the productivity of main food crops cultivated during the Kharif season. Unit No. **Unit Title** No. of hours (per Unit) Unit I Introductio 6 Introduction to important Kharif Crops of uttarakhand including different cultural practices Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield of Kharif crops. **Unit II Cultivation practices of Cereal crops** 4 Cereals - Rice, Maize, Sorghum, Pearl Millet And Finger Millet. **Unit III Cultivation practices of Pulses Crops** Pulses-Pigeonpea, Mungbean and Urdbean. **Unit IV Cultivation practices of Oilseed Crops** 4 Oilseeds- Sesame, Groundnut, and Soybean. Unit V **Cultivation practices of fiber and Forages Crops** 5 Fibre crops- Cotton & Jute. Forage crops-Maize, Sorghum, Cowpea, Cluster bean and Napier **Text Books** 1. Mukund joshi. Textbook of field crops. Amazon asia-pacific holdings privatelimited. 2. Dr. G.s. Tomar, Dr. S.k. Taunk, Dr. J.l. Choudhary. Science of crop production part-1 (kharif crops). Ashabookhouse Reference Books 1. Joshi M. Textbook of Field Crops. Jain Brothers. 2. Field Crop (Kharif) – ICAR ECourse. TNAU **Mode of Evaluation** Internal and External Examination 31.05.2022 Recommendation byBoard of Studies

BSc Agriculture V 2022

Course Outcome for AG3301

| Unit-wise CourseOutcome | Descriptions | BL Level | Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (<i>Use</i> , for more than One) |
|----------------------------|---|----------------|--|
| CO1 | Students will gain knowledge about important kharif crops of Uttarakhand | <mark>3</mark> | Emp, S |
| CO2 | Students will understand about commercial cultivation of cereals; they will use their farming knowledge in field to get good yield | 3 | Emp, S, Ent |
| CO3 | Students will understand about commercial cultivation of Pulses; they will use their farming knowledge in field to get good yield | 3 | Emp |
| CO4 | Students will understand about commercial cultivation of OilSeed crops; they will use their farming knowledge in field to get good yield | 3 | Emp, <mark>S,</mark> Ent |
| CO5 | Students will understand about commercial cultivation of fiber and forage crops; they will use their farming knowledge in field to get good yield | 3 | Emp, S |

|-----------------------------|--|---------|--|--|--|--|--|--|--|--|
| | | 0 0 2 1 | | | | | | | | |
| Version No. | 1.0 | | | | | | | | | |
| Course Prerequisite s | Nil | | | | | | | | | |
| Objectives | Students will have hands on experience and perform laboratory work in identifying and analyzing different environmental problems related with air, water pollution, and environmental degradation. | | | | | | | | | |
| | List of | | | | | | | | | |
| | Experiments | | | | | | | | | |

(Perform any seven experiments)

- 1. Determination of alkalinity of the supplied water sample
- 2. Determination of temporary and permanent hardness of water using EDTA (Disodium salt of ethylenediamine tetra acetic acid)
 - 3. Determination of dissolved oxygen in the given sample of water
 - 4. Determination of BOD (Biological Oxygen Demand) in water
 - 5. Determination of COD (Chemical Oxygen demand in water) in water
 - 6. Determination of pH, Conductivity and turbidity in some drinking water sample and preparation of report
 - 7. Determination of Total dissolved solids in water / effluent sample
 - Documentation of natural resources in local area (river, forest, lake and pond)
 - 9. Study of common plants, birds and mammals in local area
 - 10. Report on visit to National Parks
 - 11. Report on visit to local polluted sites

Title: Agricultural Finance and Co-operation Lab

L T P
C0 0 2
1

Version No.

1.0

Course Prerequisite s

Objectives

To understand the Structure of Agriculture Finance and Co-operation in India.

List of Experiments

(Perform any seven experiments)

- 1. To study of plotting and study of demand and supply curves and calculation of elasticity
- 2. To study of relationship between market arrivals and prices of some selected commodities
- 3. To study of Computation of marketable and marketed surplus of important commodities
 - 4. To Study of price behavior over time for some selected commodities
 - 5. To study of Construction of index numbers
- 6. Visit to a local market to study various marketing functions performed by different agencies
 - 7. Identification of marketing channels for selected commodity
- 8. Collection of data regarding marketing costs, margins and price spread and presentation of report in the class
 - 9. Visit to market institutions NAFED, SWC, CWC, cooperative marketing society, etc. to study their organization and functioning
 - 10. To study Application of principles of comparative advantage of international trade
- 11. Preparation of Bankableprojects for various agricultural products and its value added products. Seminar on selectedtopics.

| Objectives | Students will be familiarized to different crop simulation models, use of DBMS in agriculture; will gain awareness on smart phone mobile apps in agriculture and application of decision support system in agriculture. | |
| | List of Experiments | |

(Perform any Seven Experiments)

- 1. Study of Computer Components, accessories, practice of important DOS Commands.
- 2. Introduction of different operating systems such as windows, Unix/ Linux, Creating, Files & Folders, FileManagement.
 - 3. Use of MS-WORD and MS Power-point for creating, editing and presenting a scientific Document.
- 4. MS-EXCEL Creating a spreadsheet, use of statistical tools, writing expressions, creating graphs, analysis ofscientific data.
 - $5.\ MS-ACCESS: Creating\ Database,\ preparing\ queries\ and\ reports,\ demonstration\ of\ Agriin formation\ system.$
 - 6. Introduction to World Wide Web (WWW).
 - 7. Introduction of programming languages.
 - 8. Hands on Crop Simulation Models (CSM) such as DSSAT/Crop-Info/CropSyst/ Wofost;
 - 9. Computation of water and nutrient requirements of crop using CSM and IT tools.
 - 10. Introduction of Geospatial Technology for generating valuable information for Agriculture.
 - 11. Hands on Decision Support System.
 - 12. Preparation of contingent crop planning.

B. Sc Agriculture V 2022

| AG3343 | Title: Farm Machinery and Power Lab | LTPC |
|-----------------------------|--|---------|
| | | 0 0 2 1 |
| Version No. | 1.0 | |
| Course Prerequisite s | Nil | |
| Objectives | To study the socio-economic conditions of the farmers and assess their capabilities for acquiring and adopting the needed <i>agricultural equipment</i> /machinery and the uses of farm <i>power</i> , ultimate requirement, ways and means to fulfill the gaps for various farm operations. | |

List of Experiments

(Perform any seven experiments)

- 1. Study of different components of I.C. engine.
- 2. To study air cleaning and cooling system of engine, Familiarization with clutch, transmission, differential and final drive of a tractor.
- 3. Familiarization with lubrication and fuel supply system of engine, Familiarization with brake, steering, hydraulic control system of engine, Learning of tractor driving.
 - 4. Familiarization with operation of power tiller, Implements for hill agriculture.
- 5. Familiarization with different types of primary and secondary tillage implements: mould plough, disc plough and disc harrow.
- 6. Familiarization with seed-cum-fertilizer drills their seed metering mechanism and calibration, planters and transplanter.
 - 7. Familiarization with different types of sprayers and dusters.
- 8. Familiarization with different inter-cultivation equipment, Familiarization with harvesting and threshing machinery.

| AG3402 | Title: Introductory Agro-Meteorology & Climate Change | L T P C 2 0 0 2 | | | | | | | |
| Version No. | 1.0 | _ | | | | | | | |
| Course Prerequisites | Nil | | | | | | | | |
| Objectives | This course aims to learn the basic concepts of Agro meteorology and its applications in agriculture and knowledge about climate change. | | | | | | | | |
| Unit Nos. | Unit Title | Number of hours (per Unit) | | | | | | | |
| Unit I | Introduction and Earth atmosphere | 4 | | | | | | | |
| | agricultural meteorology; Earth atmosphere- its composition, extent and struzariables; Atmospheric pressure, its variation with height. | icture; | | | | | | | |
| Unit II | Wind and solar radiation | 5 | | | | | | | |
| | laily and seasonal variation of wind speed, cyclone, anticyclone, land breez of solar radiation, solar constant, depletion of solar radiation, short way radiation, albedo. | | | | | | | | |
| Unit III | Atmospheric temperature and concepts of saturation | 6 | | | | | | | |
| vertical profile of tem pressure, process of co | ture, temperature inversion, lapse rate, daily and seasonal variations of apperature, Energy balance of earth; Atmospheric humidity, concept of sa ondensation, formation of dew, fog, mist, frost, cloud; Precipitation, proprecipitation such as rain, snow, sleet, and hail. | turation, vapor | | | | | | | |
| Unit IV | Cloud | 3 | | | | | | | |
| | formation | | | | | | | | |
| Cloud formation and clagriculture. | lassification; Artificial rainmaking. Monsoon- mechanism and importance in | ı Indian | | | | | | | |
| Unit V | Climate change | 6 | | | | | | | |
| cold-wave. Agriculture livestock production.V | ught, floods, frost, tropical cyclones and extreme weather conditions such e and weather relations; Modifications of crop microclimate, climatic norm. Weather forecasting- types of weather forecast and their uses. Climate ming, causes of climate change and its impact on regional and national | nals for crop and | | | | | | | |

BSc Agriculture V 2022

| AG3408 | Title: Agricultural Marketing Trade & Price | LTPC |
|-------------------|--|---------|
| | | 2 0 0 2 |
| Version No. | 1.0 | |
| Course | Nil | |
| Prerequisite | | |
| S | | |
| Objectives | To understand the Structure of Agriculture marketing in India. | |
| Unit No. | Unit Title | No. of |
| | | hours |
| | | (per |
| | | Unit) |
| Unit I | Agriculture | 4 |
| | Marketing | |

Agricultural Marketing: Concepts and definitions of market, marketing, agricultural marketing, market structure, marketing mix and market segmentation, classification and characteristics of agricultural markets; demand, supply and producers surplus of agri-commodities: nature and determinants of demand and supply of farm products, producers surplus meaning and its types, marketable and marketed surplus, factors affecting marketable surplus of agri-commodities.

Unit II Product Life cycle and Competitive Strategies

5

Product life cycle (PLC) and competitive strategies: Meaning and stages in PLC; characteristics of PLC; strategies indifferent stages of PLC; pricing and promotion strategies: pricing considerations and approaches – cost based and competition based pricing; market promotion advertising, personal selling, sales promotion and publicity – their meaning and merits & demerits.

Unit III Marketing Process

5

Marketing process and functions: Marketing process-concentration, dispersion and equalization; exchangefunctions buying and selling; physical functions storage, transport and processing; facilitating functions packaging, branding, grading, quality control and labeling (Agmark).

Unit IV Market Functionaries and Marketing Channels

5

Market functionaries and marketing channels: Types and importance of agencies involved in agricultural marketing; meaning and definition of marketing channel; number of channel levels; marketing channels for different farm products; Integration, efficiency, costs and price spread: Meaning, definition and types of market integration; marketing efficiency; marketing costs, margins and price spread; factors affecting cost of marketing; reasons for higher marketing costs of farm commodities; ways of reducing marketing costs; Role of Govt. in agricultural marketing.

Unit Public sector and Agricultural Prices and Policy

5

Public sector institutions- CWC, SWC, FCI, CACP & DMI – their objectives and functions; cooperative marketing in India; Risk in marketing: Types of risk in marketing; speculation & hedging; an overview of futures trading; Agricultural prices and policy: Meaning and functions of price; administered prices; need for agricultural price policy; Trade: Concept of International Trade and its need, theories of absolute and comparative advantage. Present status and prospects of international trade in agri-commodities; GATT and WTO; Agreement on Agriculture (AoA) and its implications on Indian agriculture. IPR.

BSc Agriculture V 2022

Course Outcome for AG3408

| Unit-wise Course Outcome | Descriptions | BL Level | Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (<i>Use</i> , <i>for more</i> than One) |
|--------------------------------|---|-------------|---|
| CO ₁ | Identify elements of business success in agriculture and food-processing as well as elements that determine economic role of agriculture in national economy. | 3 | Emp, S |
| CO2 | An efficient agricultural marketing system leads to the optimization of resource use and output management | 3 | Emp, S, Ent |
| CO3 | An efficient marketing system ensures higher levels of income for the farmers by reducing the number of middlemen or by restricting the commission on marketing services and the malpractices adopted by them in the marketing of farm products | 3 | Emp |
| / CO4 | An improved and efficient system of agricultural marketing helps in the growth of agrobased industries and stimulates the overall development process of the economy. Many industries depend on agriculture for the supply of raw materials. | 3 | Emp, <mark>S,</mark> Ent |
| CO5 | This course aims at imparting knowledge on principles of finance, banking and co –operation and farm financial analyses. | 3 | Emp, S |

| AG3440 | Title: Introductory Agro-Meteorology & Climate Change Lab | L T P C 0 0 21 |
| Version No. | 1.0 | |
| Course Prerequisites | Nil | |
| Objectives | This course aims to learn the basic concepts of Agro meteorology. | |
| Course Outcome | CO 1: Students will learn the basic concepts of agro meteorology, applications of agro meteorology in agriculture. CO 2: Students will be able to deal with the relationship between weather/climatic conditions and agricultural production. CO 3: Student will be able to determine the climatic features, air temperature, humidity etc. CO4: Students would have gained knowledge on cloud formation and artificial cloud making CO5: Students would have gained knowledge on climate change | |
| | List of Experiments | L |

(Perform any Seven)

- 1. Visit of Agro meteorological Observatory, site selection of observatory.
- 2. Exposure of instruments and weather datarecording.
- 3. Measurementoftotal, shortwaveandlong waveradiation, and its estimation using Planck's intensity law.
- 4. Measurement of albedo and sunshineduration.
- 5. Computation of Radiation Intensity using BSS.
- 6. Measurementofmaximumandminimumairtemperatures, its tabulation, trendand variation analysis.
- 7. Measurement of soil temperature and computation of soil heatflux.
- 8. Determination of vapor pressure and relativehumidity.
- 9. Determination of dew pointtemperature.
- 10. Measurement of atmospheric pressure and analysis of atmospheric conditions.
- 11. Measurement of wind speed and wind direction, preparation of windrose.

|-----------------------------|---|---------|--|--|--|--|
| | | 0 0 2 1 | | | | |
| Version No. | 1.0 | | | | | |
| Course Prerequisites | Nil | | | | | |
| Objectives | To study proven technologies for wheat-legume rotation systems through the scaling out of improved wheat and food legume varieties and associated production technologies, including supplemental irrigation. To develop stable and high yielding varieties of both food and cash crops. | | | | | |
| List of Experiments | | | | | | |

(Perform any Seven Experiments)

- 1. Sowing methods of wheat and sugarcane,
- 2. Identification of weeds in *rabi* season crops,
- 3. Study of morphological characteristics of *rabi* crops,
- 4. Study of yield contributing characters of *rabi* season crops,
- 5. Yield and juice quality analysis of sugarcane.
- 6. Study of *rabi* forage experiments, oil extraction of medicinal crops,
- 7. Preparation of balance sheet including cost of cultivation, net returns per student as well as per teamof 8-10 students
- 8. Visit to research stations of related crops

| AG3445 | Title: Principles of Seed Technology Lab | LTPC 0021 |
|-----------------------------|--|--------------|
| Version No. | 1.0 | |
| Course Prerequisite s | Nil | |
| Objectives | Students will be able to understand the concepts of seed science and technology and impart training for entrepreneurship in commercial seed production of various crops. | |
| | List of Experiments | |

(Perform any seven experiments)

- 1. Seed production in major cereals: Wheat, Rice, Maize, Sorghum, Bajra and Ragi.
- 2. Seed production in major pulses: Urd, Mung, Pigeon pea, Lentil, Gram, Field bean, pea.
- 3. Seed production in major oilseeds: Soybean, Sunflower, Rapeseed, Groundnut and Mustard.
- 4. Seed production in important vegetable crops.
- 5. Seed sampling and testing: Physical purity, germination, viability, etc.
- 6. Seed and seedling vigor test.
- 7. Genetic purity test:
- 8. Grow out test and electrophoresis.
- 9. Seed certification: Procedure, Field inspection, Preparation of field inspection report.
- 10. Visit to seed production farms, seed testing laboratories and seed processing plant.

List of Experiments

(Perform any seven experiments)

- 1. To study of plotting and study of demand and supply curves and calculation of elasticity
- . To study of relationship between market arrivals and prices of some selected commodities
- 3. To study of Computation of marketable and marketed surplus of important commodities
- 4. To Study of price behavior over time for some selected commodities
- 5. To study of Construction of index numbers
- 6. Visit to a local market to study various marketing functions performed by different agencies
- 7. Identification of marketing channels for selected commodity
- 8. Collection of data regarding marketing costs, margins and price spread and presentation of report in the class
- 9. Visit to market institutions NAFED, SWC, CWC, cooperative marketing society, etc. to study their organization and functioning
- 10. To study Application of principles of comparative advantage of international trade
- 11. Preparation of Bankableprojects for various agricultural products and its value added products. Seminar on selectedtopics.

| AG3503 | Title: Intellectual Property Rights | LTPC |
|----------------|---|-------------------|
| | | 1 0 0 1 |
| Version No. | 1.0 | |
| Course | Nil | |
| Prerequisit es | | |
| Objectives | Students will be understanding IP and associated rights; will study about types of IP and legislation covering IPR in India; impart significance of IPR in realizing wealth and value creation as knowledge based economy. | |
| Unit Nos. | Unit Title | Number ofhours |
| Unit 1 | Introduction | (per Unit) |
| | nd meaning of intellectual property, brief introduction to GATT, WTO, TRIPs and W ion: Madrid protocol, Berne Convention, Budapest treaty, etc | TPO, Treaties |
| Unit 2 | IPR | 5 |
| | lectual Property and legislations covering IPR in India:-Patents, Copyrights, Trademagn, Geographical indications, Integrated circuits, Trade secrets. Patents Act 1970 | rk, |
| Unit 3 | Patents | 6 |
| - | in India, patentability, process and product patent, filing of patent, patent specificatio opposition and revocation, infringement, Compulsory licensing, Patent Cooperation Tent database. | • |
| Unit 4 | Plant Protection | 6 |
| varieties unde | story including a brief introduction to UPOV for protection of plant varieties, Pror UPOV and PPV&FR Act of India, Plant breeders rights, Registration of plant 2001, breeders, researcher and farmers rights. Traditional knowledge meaning an | varieties under |
| Unit 5 | International Treaty on Plant Genetic Resources | 4 |

| Convention on | Convention on Biological Diversity, International treaty on plant genetic resources for food and agriculture | | | | | | | |
|---------------|--|--|--|--|--|--|--|--|
| (ITPGRFA). I | ndian Biological Diversity Act, 2002 and its salient features, access and benefit sharing. | | | | | | | |

| AG3540 | Title:Manures, Fertilizers and Soil Fertility Management Lab | L | T | P | C |
|-----------------------------|--|---|---|---|---|
| | | 0 | 0 | 2 | 1 |
| Version No. | 1.0 | | | | |
| Course Prerequisite s | Nil | | | | |
| Objectives | To impart knowledge of <i>fertilizers and manures</i> as sources of plant nutrients and apprise about the integrated approach of plant nutrition and sustainability of <i>soil fertility</i> . | | | | |
| | List of | | | | |

Experiments

- 1. Introduction of analytical instruments and their principles, calibration and applications, Colorimetry and flame photometry.
- 2. Estimation of soil organic carbon, Estimation of alkaline hydrolysable N in soils.
- 3. Estimation of soil extractable P in soils. Estimation of exchangeable K; Ca and Mg in soils.
- 4. Estimation of soil extractable S in soils.
- 5. Estimation of DTPA extractable Zn in soils. Estimation of N in plants. Estimation of P in plants.
- 6. Estimation of K in plants. Estimation of S in plants.

| To familiarize with the concepts of precision familing | Objectives | To acquaint with GIS software, data creation and editing. To familiarize with the concepts of precision farming | |

List of Experiments

(Perform any Seven)

- 1. Introduction to GIS software, spatial data creation and editing.
- 2. Introduction to image processing software.
- 3. Visual and digital interpretation of remote sensing images. Generation of spectralprofiles of different objects. Supervised and unsupervised classification and acreage estimation.
- 4. Multispectral remote sensing for soil mapping. Creation of thematic layers of soil fertility based on GIS.
- 5. Creation of productivity and management zones.
- 6. Fertilizer's recommendations based of VRT and STCR techniques.
- 7. Crop stress (biotic/abiotic) monitoring using geospatial technology.
- 8. Use of GPS for agricultural survey. Formulation, characterization and applications of nanoparticles in agriculture.
- 9. Projects formulation and execution related to precision farming.

|--------------|---|---------|
| | | 0 0 2 1 |
| Version No. | 1.0 | |
| Course | Nil | |
| Prerequisite | | |
| S | | |
| Objectives | Students will be familiarized with various categories of pest, understand how IPM decisions are made and factors that influence the decision-making process and to apply knowledge gained to solve actual pest management problems. | |
| | List of | |
| | Experiments | |

(Perform any seven experiments)

- 1. Methods of diagnosis and detection of various insect pests, and plant diseases.
- 2. Methods of insect pests and plant disease measurement.
- 3. Assessment of crop yield losses, calculations based on economics of IPM.
- 4. Identification of biocontrol agents, different predators and natural enemies.
- 5. Mass multiplication of *Trichoderma*, *Pseudomonas*, *Trichogramma*, NPV etc.
- 6. Identification and nature of damage of important insect pests and diseases and their management.
- 7. Crop (agro-ecosystem) dynamics of a selected insect pest and diseases.
- 8. Plan & assess preventive strategies (IPM module) and decision making crop monitoring attacked by insect, pest and diseases.
- 9. Awareness campaign at farmers fields.

| AG3545 | Title: Pests of Crops and Stored Grains and their Management Lab | LTPC |
|-----------------------------|---|---------|
| | | 0 0 2 1 |
| Version No. | 1.0 | |
| Course Prerequisite s | Nil | |
| Objectives | The main objective is to identify the insect and mite pests and study about their symptoms, biology, host range, etc. under field and storage conditions and to study suitable/viable management strategies | |
| | List of Experiment s | |

(Perform any seven experiments)

- 1. Identification of different types of damage caused by pest and insect.
- 2. Identification and study of life cycle and seasonal history of various insect pests attacking crops and their produce: (a) Field Crops; (b) Vegetable Crops; (c) Fruit Crops; (d) Plantation, gardens, Narcotics, spices & condiments.
- 3. Identification of insect pests and Mites associated with stored grain.
- 4. Determination of insect infestation by different methods. Assessment of losses due to insects.
- 5. Calculations on the doses of insecticides application technique. Fumigation of grain store / godown. Identification of rodents and rodent control operations in godowns.
- 6. Identification of birds and bird control operations in godowns.
- 7. Determination of moisture content of grain.
- 8. Methods of grain sampling under storage condition.
- 9. Visit to Indian Storage Management and Research Institute, Hapur and Quality Laboratory, Department of Food., Delhi. Visit to nearest FCI godowns.

| 0. | erry silkworm and methods of disinfection. supplements and feed additive | |
| of livestock and por | ultry. | - |
| Unit V | Study of lac insect | 6 |

BSc Agriculture V 2022

Species of lac insect, morphology, biology, host plant, lac production – seed lac, button lac, shellac, lac- products. Identification of major parasitoids and predators commonly being used in biological control. Insect orders bearing predators and parasitoids used in pest control and their mass multiplication techniques. Important species of pollinator, weed killers and scavengers with their importance.

|--------------|---|---------|
| | | 0 0 2 1 |
| Version No. | 1.0 | |
| Course | Nil | |
| Prerequisite | | |
| S | | |
| Objectives | Students will be learning about soil and water conservation techniques, to manage crops in rainfed areas and to demonstrate soil moisture | |
| | conservation and water harvesting structures. | |
| | List of | |
| | Experiments | |

(Perform any seven experiments)

- 1. Studies on climate classification
- 2. Studies on rainfall pattern in rainfed areas of the country and pattern of onset and withdrawal of monsoons.
- 3. Studies on cropping pattern of different rainfed areas in the country and demarcation of rainfed area on map of India.
- 4. Interpretation of meteorological data and scheduling of supplemental irrigation on the basis of evapotranspiration demand of crops.
- 5. Critical analysis of rainfall and possible drought period in the country, effective rainfall and its calculation.
- 6. Studies on cultural practices for mitigating moisture stress.
- 7. Characterization and delineation of model watershed.
- 8. Field demonstration on soil & moisture conservation measures.
- 9. Field demonstration on construction of water harvesting structures.
 - 10. Visit to rainfed research station/watershed

BSc Agriculture V 2022

| | Bac Agriculture | <u>V ZUZZ</u> |
|--------------|--|---------------|
| AG3641 | Title: Protected Cultivation and Secondary Agriculture Lab | LTPC |
| | | 0 0 2 1 |
| Version No. | 1.0 | |
| Course | Nil | |
| Prerequisite | | |
| S | | |
| Objectives | Students will be learning about protected agriculture techniques ,Planning and design of greenhouses, Important Engineering properties such as physical, thermal and aero & hydrodynamic properties of cereals, pulses and oilseed, their application in PHT equipment design and operation. | |
| | List of | |
| | Experiments | |

(Perform any seven experiments)

- 01. Study of different type of greenhouses based on shape.
- 02. Determine the rate of air exchange in an active summer winter cooling system.
- 03. Determination of drying rate of agricultural products inside green house.
- 04. Study of greenhouse equipment's.
- 05. Visit to various Post Harvest Laboratories.
- 06. Determination of Moisture content of various grains by oven drying & infrared moisture methods.
- 07. Determination of engineering properties (shape and size, bulk density and porosity of biomaterials).
- 08. Determination of Moisture content of various grains by moisture meter.
- 09. Field visit to seed processing plant.

BSc Agriculture V 2022

| AG3643 | Title:Post-harvest Management and Value Addition of Fruitsand Vegetables Lab | LTPC 0 0 2 1 |
|------------------------|--|-----------------|
| Version No. | 1.0 | |
| Course Prerequisite | Nil | |
| Expecte d Outcome | Students will acquire knowledge on post harvest management tools and novel packaging techniques. | |
| | List of Experiments | |

- 1. Applications of different types of packaging, containers for shelf life extension.
- 2. Effect of temperature on shelf life and quality of produce.
- 3. Demonstration of chilling and freezing injury in vegetables and fruits.
- 4. Extraction and preservation of pulps and juices.
- 5. Preparation of jam, jelly, RTS, nectar, squash, osmotically dried products, fruit bar and candy and tomato products, canned products.
- 6. Quality evaluation of products -- physico-chemical and sensory.
- 7. Visit to processing unit/industry.

| | | 0 | 0 | 2 | 1 | |
| Version No. | 1.0 | | | | | |
| Course Prerequisites | Nil | | | | | |
| Objectives | To study about <i>beneficial insects</i> and their functions in pest control strategy, organic farming, organic gardening or integrated pest <i>management</i> . | | | | | |
| | List of | | | | | |
| | Experiments | | | | | |

(Perform any Seven Experiments)

- 1. Honey bee species, castes of bees. Beekeeping appliances and seasonal management, bee enemies and disease.
- Bee pasturage, bee foraging and communication. 2.
- 3. Types of silkworm, voltinism and biology of silkworm.
- Mulberry cultivation, mulberry varieties and methods of harvesting and preservation of leaves. 4.
- Species of lac insect, host plant identification. 5.
- Identification of other important pollinators, weed killers and scavengers. 6.
- Visit to research and training institutions devoted to beekeeping, sericulture, lac culture and 7. natural enemies.
- Identification and techniques for mass multiplication of natural enemies. 8.

| AG3613 | Title: Agricultural waste management | L T P C 1 0 0 1 |
|--|--|-------------------------|
| Version No. | 1.0 | |
| Course Prerequisites | Nil | |
| Objectives | Objective is to impart knowledge on agricultural waste management processes, utilization and recycling of waste, biogas technology and impacts of waste on human, animal health and environment. | |
| Expected Outcome | Students will be able to apply their gained knowledge to agricultural waste management. | |
| Unit No. | Unit Title | No. of hours (per Unit) |
| Unit I | Introduction | 2 |
| Introduction to agricul environment. | tural waste management, Nature and characteristics of agricultural waste and their impact on | the |
| Unit II | Classification | 3 |
| quality, Biological pro | sification, role of soil and plants in waste management, sources of waste, impact of waste on socesses of waste management, | - |
| Unit III Utilization and Recycl agriculture waste, | Recycling ing of Agricultural waste, Potential of Recyclable Crop Residues and its management, Insitu | 3 management of |
| Unit IV | Composting and Vermicomposting | 2 |
| | nicomposting for bio conservation of biodegradable waste, Biogas Technology, Agricultural wes, Impacts of waste on human, animal health and environment. | vaste and water, |
| Unit V | Waste Management | 2 |
| | ng & litter, wasted feed, run-off from feed lots and holding areas and waste water from dairy path farming system, waste management machineries, environmental benefit of waste management | |
| Text Books | 1. Agricultural Waste Management: Problems, Processes, and Approaches - Raymond C. L | |
| Reference Books | 1. Sustainable Technologies for the Management of Agricultural Wastes - Zainul Akma Zainul | karia. |
| Mode of Evaluation | Internal and External Examination | |
| Recommendation by Board of Studies on | | |
| Date of approval by the Academic Council | | |
| Council | | |

Course Outcome for AG3613

| Unit-wise CourseOutcome | Descriptions | BL Level | Employability (Emp)/ Skill(S)/ Entrepreneurship (Ent)/ None (Use, for more than One) |
|----------------------------|---|-------------|---|
| CO1 | Initiative from Government for organic produce. | 3 | Emp, <mark>S</mark> |
| CO2 | Role of NGOs in producing organic products. | 3 | Emp, S, Ent |
| CO3 | Selection of crops and varieties for organic produce | 3 | Emp |
| CO4 | Students will gain the knowledge about the methods of propagation | 3 | Emp, <mark>S</mark> , Ent |
| CO5 | Students will be aware about layout and planting of orchard. | 3 | Emp, S |
